Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

	Application No.	Applicant(s)				
Office Action Comments	10/731,624	HAYES ET AL.				
Office Action Summary	Examiner	Art Unit				
	Quochien B. Vuong	2618				
The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply						
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Arguments

Applicant's arguments with respect to claims 4, 7-11, and 27 have been considered but are moot in view of the new ground(s) of rejection.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 4, 10, 11, and 27 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1 and 4-6 of U.S. Patent No. 7,305,090. Although the conflicting claims are not identical, they are not patentably distinct from each other because:

Art Unit: 2618

Regarding claim 4 of the present application, claim 1 of U.S. Patent No. 7,305,090 encompasses all the claimed limitations including a method comprising: granting radio network access to a first wireless device operating under shared radio access data and then, in response to first pre-registration data used by the first wireless device, engaging in a first over-the-air registration of the first wireless device (i) to establish a first user account for the first wireless device with a media management server and (ii) to provision the first wireless device with first post-registration data; granting radio network access to a second wireless device operating under the same shared radio access data and then, in response to second pre-registration data used by the second wireless device, engaging in a second over-the-air registration of the second wireless device (i) to establish a second user account for the second wireless device with the media management server and (ii) to provision the second wireless device with second post-registration data different than the first post-registration data~ wherein the shared radio access data comprises a shared mobile identification number electronic serial number (MIN-ESN) pair, the method further comprising setting a network authentication entity to allow multiple wireless devices to operate concurrently under the same shared radio access data.

Regarding claim 10, claim 5 of U.S. Patent No. 7,305,090 encompasses all the claimed limitations including wherein engaging in the first over-the-air registration comprises sending and receiving web communications between the media management server and the first wireless device, collecting user information for the first user account, and sending the first post-registration data to the first wireless device; and

wherein engaging in the second over-the-air registration comprises sending and receiving web communications between the media management server and the second wireless device, collecting user information for the second user account, and sending the second post-registration data to the first wireless device.

Regarding claim 11, claim 4 of U.S. Patent No. 7,305,090 encompasses all the claimed limitations including after provisioning the first wireless device with the first post-registration data, the media management server allowing the first wireless device to uses the first post-registration data in gaining access the first user account; and after provisioning the second wireless device with the second post-registration data, the media management server allowing the second wireless device to uses the second post-registration data in gaining access the second user account.

Regarding claim 27, claim 6 of U.S. Patent No. 7,305,090 encompasses all the claimed limitations including wherein the first wireless device comprises a wirelessly-equipped digital camera, and wherein the second wireless device comprises a wirelessly-equipped digital camera.

Allowable Subject Matter

Claims 7-9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Quochien B. Vuong whose telephone number is (571) 272-7902. The examiner can normally be reached on M-F 9:30-18:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nay Maung can be reached on (571) 272-7882. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.

/Quochien B Vuong/ Primary Examiner, Art Unit 2618
